## MOTIF

*The motif of Kirtimukha, also called Vyalamukha, reproduced above has been found on bricks or stones used in ancient times on top of a prabhatorana, on arches of doorways, niches of temples and the back of idols. It was meant to terrify the non-believers and evil spirits as well as to protect the believers. Sonipat was among the centres which witnessed a resurgence of arts during the Gurjara Pratihara period.*

*While the tradition ascribing the foundation of the town of Sonipat to a mythical King Soni, supposed to be thirteenth in descent from Arjuna, brother of Yudhishtira its great antiquity is evident from the mention of its original name Sonaprastha by the celebrated grammarian Panini who flourished around 6th century B.C.*

## FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level of the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/Police Station/CD Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri O.P. Bharadwaj, I.A.S., the Director of Census Operations, Haryana on behalf of the State Government which has borne the cost of printing. The

task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi

the 26th April, 1982

**P. PADMANABHA**  
Registrar General, India.

## **PREFACE**

In March, 1981, the provisional population totals of Haryana State were released after the enumeration was over. The actual enumeration was conducted from 9th February to 28th February, 1981, with a revisional round from 1st March to 5th March, 1981 in order to bring the Census count correct upto the reference date, i.e., the sunrise of 1st March, 1981.

In Paper-I of 1981 figures down to the district level and cities with population of 100,000 and above had been given and basic data relating to total population including sex ratio, density, decennial growth rate, literacy and sexwise break up of population were presented. Thereafter a supplement to Paper-I of 1981 was brought out presenting a few other characteristics of population based on provisional results of 1981 Census. It covered information on urban population and work participation rates of the male and female population. Data down to the tahsil and town levels in the form of Primary Census Abstract and on disabled persons were also included.

The 1981 series of District Census Handbooks to which this volume belongs has been divided into two parts. Part- A presents data obtained from the field on land use pattern and amenities such as drinking water, post and telegraph, educational, medical etc. available in each village and civic and other amenities in each town. Part-B presents demographic data down to the village level in rural areas and ward level in the case of urban areas. Enumeration blockwise figures of total population and Scheduled Castes population in case of urban areas are shown in an appendix at the end of Primary Census Abstract. Our attempt has been to present the information concerning each district in its maximum possible details in the hope that these volumes will prove useful to scholars, planners and those who are working to improve the economic condition of the people particularly in our State and generally in the country as a whole.

Dated : Chandigarh  
the 7th January, 1983

**O. P. BHARADWAJ**  
Director of Census Operations,  
Haryana

## ACKNOWLEDGEMENTS

In a country like India, with the dimensions of a sub-continent and one sixth of the world's population Census is a gigantic task. That we have been able to accomplish it successfully is largely due to the inspiration and guidance of Shri P. Padmanabha, Registrar General and Census Commissioner, India. His deep understanding of both the conceptual as well as the practical aspects of Census and complete identification with the job have been a living example to us all and his ever-smiling and unruffled expression, always considerate and sympathetic view of our problems and polite but firm handling of difficult situations made him an ideal captain of the team engaged in a stupendous undertaking. First and foremost, therefore, I must express my grateful thanks to him for showing us the right direction in steering the Census ship through difficult waters.

For the massive operation of actual Census taking, the whole country is divided into convenient Enumeration Blocks covering about 750 persons in the rural areas and about 650 persons in the urban areas. In Haryana State as many as 20,534 Enumeration Blocks were demarcated and 23,603 Enumerators and Supervisors were appointed and trained for the work of actual count, besides the Principal Census Officers, District Census Officers, Additional District Census Officers, Sub-Divisional Census Officers, Charge Officers, Deputy Charge Officers and Assistant Charge Officers who organised and co-ordinated the work in their respective areas of jurisdiction. An overwhelming majority of the Enumerators and Supervisors was drawn from the Education Department of the State and the remaining from Central/State Government Departments and from the Offices of Local Bodies. They canvassed the basic Census schedule i.e., the Individual Slip for each person by moving from house to house during the Enumeration period. I, therefore, take this opportunity to express my deep appreciation for these thousands of field workers who at considerable inconvenience to themselves worked hard to make the colossal task of the 1981-Census a success.

A large share of the credit goes to the State Census Officers in the districts who discharged their duties with full vigour and enthusiasm. I am really grateful to them for their ungrudging co-operation. I must also acknowledge with gratitude the active help and co-operation extended by the Government of Haryana at all levels and the goodwill shown by the people of the State to the staff working for the Census Organisation.

The great mass of information collected in the field was edited and processed in our two Regional Tabulation Offices located at Ambala and Kurukshetra with the help of 500 odd Tabulators, Checkers and Supervisors. The compilation of Primary Census Abstract is an outcome of the hard labour put in by the dedicated team of officials consisting of Tabulators, Checkers, Supervisors, Statistical Assistants and Investigators in these Regional Tabulation Offices. All of them deserve praise for hard work put in by them to complete the work in the stipulated period. The Regional Tabulation Office at Ambala Sadar was looked after by Shri S.L. Bahl, Deputy Director who was assisted by Shri A.L. Kakkar, Investigator and four Statistical Assistants while the Regional Tabulation Office at Kurukshetra was controlled by Shri R.K. Puri, Deputy Director who was assisted by Shri Vinod Kumar Babbar, Investigator and four Statistical Assistants. Shri J.R. Vashistha, Assistant Director not only helped me in the Head office by effectively supervising the work of collection and compilation of data for Village and Town Directories and Editing and Coding Cell but also worked as Deputy Director Incharge of both the Regional Tabulation Offices for some time when no other Officer was available for manning these offices. I would like to record my appreciation of the assistance provided by these officers/officials.

Village and Townwise Primary Census Abstracts prepared in the two Regional Tabulation Offices were checked and finalised in the Head office by a team of Statistical Assistants and Shri Jaswant Lal, Investigator under the supervision of Sarvshri J.R. Vashistha and J.N. Suri, Assistant Directors. These abstracts form Part-B of this District Census Handbook.

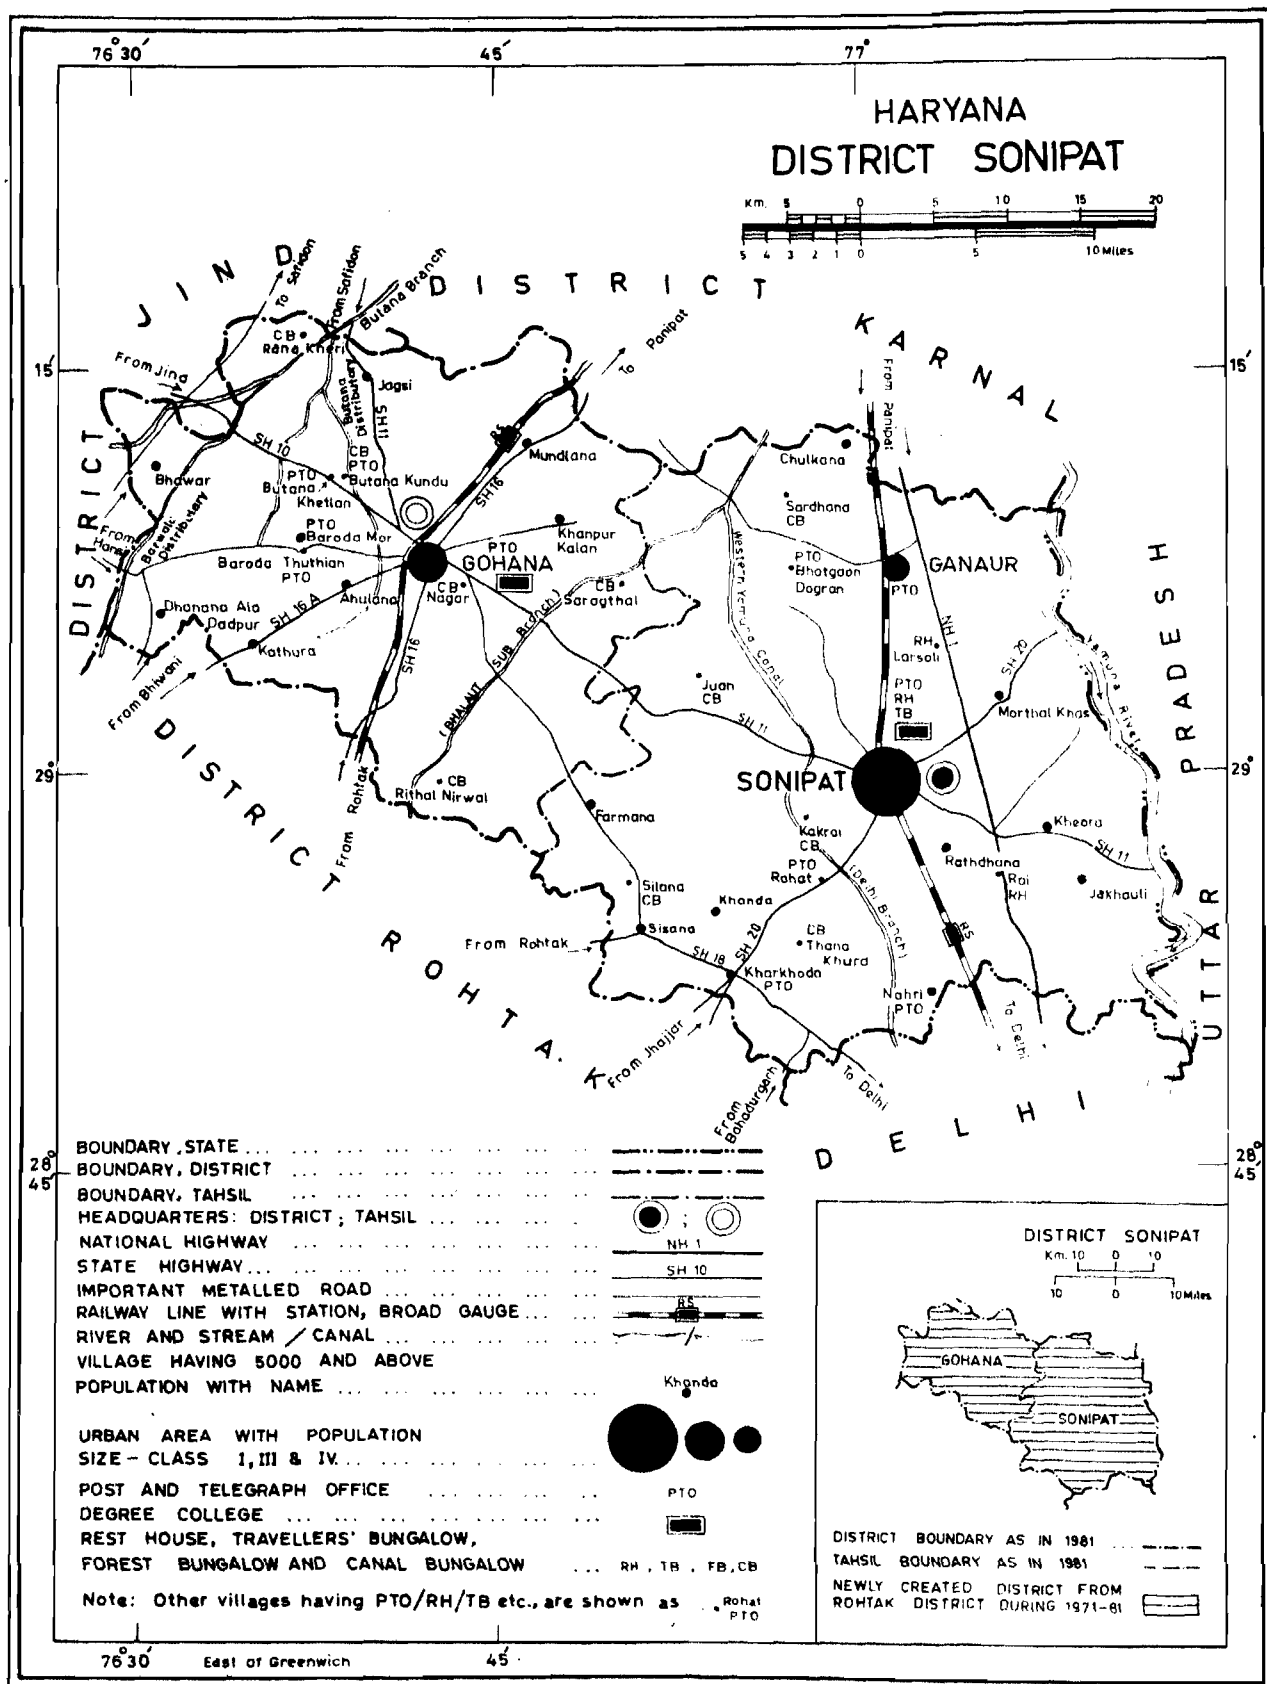

The data contained in Village and Town Directories which form Part-A of this Handbook was collected by us from the District Revenue Agency and the Local Bodies. We also approached various State Government Departments to provide the relevant data for cross checking the accuracy of the information collected from the field by the above mentioned two agencies. I am indebted to them for the co-operation and promptness with which they met our requirements. In my office, the data thus collected was processed and finalised into various statements by a team of efficient Computers, Statistical Assistants and Investigators. I would particularly mention in this connection the names of Sarvshri Koshy P. Zachariah and Amarjit Singh, Investigators and Mrs. S.P. Ratra, Statistical Assistant for the hard work put in by them.

The maps included in the Handbook and cover design were prepared in the Map Section headed by Shri J.P. Purohit, Cartographer under the competent supervision and able guidance of Shri S. R. Puri, Research Officer (Map). I have also to mention the assistance rendered in the preparation of the draft of this Handbook by Shri R.K. Aggarwal, Deputy Director, Shri J.N. Suri, Assistant Director and Shri S.R. Puri, Research Officer.

I have to record with gratitude the valuable assistance provided by Shri N.G. Nag, Deputy Registrar General (Social Studies), Dr. B.K. Roy, Deputy Registrar General (Map), Shri M.M. Dua, Senior Research Officer, Shri S.C. Srivastava, Assistant Central Tabulation Officer and their staff in scrutinising portions of this Handbook relating to their respective branches in the office of the Registrar General, India.

This brief section on acknowledgements is by no means exhaustive and there are many more unnamed people to whom my thanks are due but before I close I must thank Shri K.M.S. Pillai, Controller and Shri P. Oommen, Deputy Controller, of Printing and Stationery, Chandigarh Administration, for making a good job of the printing of this Handbook.

# **IMPORTANT STATISTICS**

			STATE	DISTRICT
Population	Total	Persons	12,922,618	846,765
		Males	6,909,938	453,873

## **ANALYTICAL NOTE**

## CONCEPTS AND DEFINITIONS

It has been the tradition of the Indian Censuses to present Census data for rural and urban areas separately. In fact, in all the censuses throughout the world, this classification of census data into rural and urban units is generally recognised and data presented accordingly. But the distinction between rural and urban is not yet amenable to a single definition which could be applicable to all countries.

### The Village defined

The definition of the village adopted in our State for the Census, corresponds to the one contained in the Punjab Land Revenue Act, 1887. It is associated with the levy and collection of the land revenue by the Government and is as such, exclusively administrative in character. From this point of view, a village is better called a Revenue Estate, meaning thereby an 'Estate' (a specific and demarcated area of land) marked as such for the purposes of levy/realisation of the land revenue. As the land revenue is to be realised from the landholders, it was necessary for the Government to prepare and maintain a separate record of rights of the holders of land for each village. The Revenue Estate or 'Mauza' the name given to the village in the Punjab Land Revenue Act, 1887, has accordingly been defined "as an area of which a separate record of rights is maintained or which has been separately assessed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an Estate". This definition of village has been adopted for the purposes of the Census ever since the year 1901. The village, therefore, is not merely the inhabited area (abadi deh) of a village but refers to the entire land coming within a fixed boundary. In certain cases, in fact, a village may be uninhabited.

### Urban area defined

After considerable thought, the following definition of an urban unit adopted at the 1961 and 1971 Censuses has been retained with a minor variation for the 1981 Census:

- (a) All places with a municipality, corporation, cantonment board or a notified area committee etc.
- (b) All other places which satisfied the following criteria :
  - (i) A minimum population of 5,000 ;
  - (ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and
  - (iii) A density of population of at least 400 per square kilometre (1000 per square mile).

In 1961 and 1971 Censuses the males working in activities such as livestock, forestry, fishing hunting and plantations, orchards and allied activities were treated as engaged in non-agricultural pursuits and therefore contributed to the 75 per cent criterion whereas in the 1981 Census these activities are treated at par with cultivation and agricultural labour for the purpose of this criterion.

In addition to all municipal areas/cantonment board, four village namely (1) Babiya in Ambala district, (2) Samalkha in Karnal district, (3) Gurgaon (rural) and (4) Jharsa in Gurgaon district satisfying the above criteria have been treated as census towns (non-municipal) in 1981 Census. Panchkula Urban Estate in Ambala district has also been treated as a town. The Faridabad Complex Administration consisting of Faridabad, Faridabad Township and Ballabgarh towns of 1971 and some surrounding villages, in Faridabad district has been treated as an independent town. The total number of towns in the State in 1981 Census has thus risen to 81 as compared to 65 in 1971 Census.

### What is a Census House

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purpose or for both.

### What constitutes a Household

A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both.

Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called 'Institutional households'. By 'Houseless Household' is meant a household, the members of which do not have a house to live in and spend the night on foot paths etc. There may be one member households, 2 member households or multimember households. For census purposes, each one of these types is regarded as a 'household'.

#### **Definition of Scheduled Castes/Scheduled Tribes**

The terms 'Scheduled Castes' and 'Scheduled Tribes' have been defined in clauses 24 and 25 of article 366 of the Constitution, respectively as follows :—

"Scheduled Castes" mean such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under article 341 to be scheduled castes for the purposes of the Constitution.

"Scheduled Tribes" means such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under article 342 to be scheduled tribes for the purposes of the Constitution.

Under articles 341 and 342 of the Constitution, the President is empowered to specify the list of scheduled castes and scheduled tribes for each State and Union Territory. Accordingly, the Scheduled Castes and Scheduled Tribes are listed under a Presidential Order for each State and Union Territory. In the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, as amended upto-date, as many as 37 castes are listed as Scheduled Castes in the State of Haryana. There is, however, no Scheduled Tribe, listed as such, in Haryana State.

#### **Who is literate**

A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

#### **Worker defined**

Like 1971 Census, a worker in 1981 Census is a person whose main activity is participation in any economically productive work by physical or mental activity. Work involves not only actual work but also effective supervision and direction of work. The main worker is one who has worked for 183 days or more in a year in one or more than one economic activity. A person who has worked for less than 183 days in a year is considered a marginal worker.

#### **And a Non-worker**

A non-worker is either mainly engaged in household duties or is a student or a dependent or a retired person or rentier or beggar or an inmate of an institution or engaged in other non-productive economic activity.

#### **Connotation of Cultivator**

For purposes of the Census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institution for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

#### **Who is Agricultural Labourer**

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

#### **Meaning of Household Industry**

Household industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

### Standard Urban Area explained

The concept of the Standard Urban Area which was adopted for the first time in 1971 envisaged a constant statistical spatial reporting unit which was to serve as the basis of urban development planning for the concerned city or town. The Standard Urban Area is defined as "the projected growth area of a city or town having 50,000 or more population in 1971, as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Thus, it is a long term planning area and is to remain as a statistical reporting unit during the three successive Censuses—1971, 1981 and 1991".

In the case of Haryana, the following eleven Standard Urban Areas were delineated :

1. Ambala
2. Bahadurgarh
3. Bhiwani
4. Faridabad Complex Administration (previously known as Faridabad-Ballabgarh Complex)
5. Gurgaon
6. Hisar
7. Karnal
8. Panipat
9. Rohtak
10. Sonipat
11. Yamunanagar-Jagadhri

### The concept of Urban Agglomeration

The concept of Urban Agglomeration adopted for the first time during the 1971 Census was an improvement on the concept of town group adopted in the 1961 Census. An urban agglomeration, must form a continuous urban spread constituting a town and its adjoining urban out-growths or two or more physically contiguous towns together with continuous well recognised urban out-growths, if any, of such towns.

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though they are outside the statutory limits of the corporation, municipality or cantonment, they fall within the revenue limits of the village or villages which is or are contiguous to the town. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units; at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area. Each such agglomeration may be made up of more than one statutory town adjoining another such as a municipality and the adjoining cantonment and also other adjoining urban growths such as a railway colony, university campus, etc. Such outgrowths which do not qualify to be treated as individual towns in their own right are to be treated as urban appendages of the units to which they are contiguous.

In 1971 Census no place was recognised as a continuous urban spread deserving to be treated as an urban agglomeration in Haryana. However, the following four urban agglomerations have been delineated at the time of 1981 Census :—

Urban Agglomeration	Constituent towns or urban outgrowths
1. Yamunanagar (U.A.)	1. Jagadhri Workshop Railway Colony (M.C.) 2. Yamunanagar (M.C.) 3. Jagadhri (M.C.)
2. Hisar (U.A.)	1. Hisar (M.C.) 2. Haryana Agricultural University and Mini Secretariat
3. Ambala (U.A.)	1. Ambala Cantt. (C.B.) 2. Ambala Sadar (M.C.)
4. Gurgaon (U.A.)	1. Gurgaon (M.C.) 2. Gurgaon Census Town

## THE DISTRICT

The present Sonipat district comprising the tahsils of Gohana and Sonipat was created in 1972, vide Haryana Government Notification No. 6050-E (IV)-72/45724, dated 22nd December, 1972. At the time of 1971 Census the two tahsils of Gohana and Sonipat now forming Sonipat district were part of Rohtak district. Tahsil Gohana consists of 94 villages and one town Gohana whereas tahsil Sonipat has 254 villages and two towns of Sonipat and Ganaur. With a population of 846,765 as per 1981 Census Sonipat ranks populationwise eleventh among districts with 6.55 per cent of the total population of the State. Being 2206\* sq. kms. in area it occupies 4.99 per cent of the total area (44,212\* sq. kms.) of the State and areawise also ranks eleventh in the State. Haryana has on an average 292 persons per sq. kilometre, with Faridabad district as the most thickly populated (466) and Sirsa as the sparsest (165). Sonipat district with 384 persons per sq. kilometre ranks second among the twelve districts of the State. In 1972, thirty four villages including one town of Maham were transferred from Gohana tahsil to Rohtak tahsil of Rohtak district. Five villages were gained by Gohana tahsil from Sonipat tahsil in 1974. Eighteen villages were transferred to Sonipat tahsil from Rohtak tahsil of Rohtak district in 1974.

The district lies between 28° 48'30" and 29° 17'54" North Latitude and 76° 28'30" and 77° 13'40" East Longitude. On its north lies Karnal district. To its north-west and west is Jind district. To its southwest and south are the districts of Rohtak and Delhi respectively. The Yamuna river makes the eastern boundary of the district and across the river lies Meerut district of Uttar Pradesh.

Since the last Census of 1971, there have been many changes in the boundaries of some of the existing districts and some new districts have also been formed. The new districts are Kurukshetra, Sonipat, Faridabad, Bhiwani and Sirsa. Thus, in 1981 the number of districts has increased to 12 from 7 in 1971. The figures presented in this volume are as per boundaries of administrative units as on 31st December, 1979. They cover 39 tahsils and 81 cities/towns including the four Census towns in the State.

### District Census Handbook

Among the traditional documentations of the Census is the fairly comprehensive and uniform District Census Handbook (DCH) consisting of Village and Town Directories and Village and Townwise Primary Census Abstract (PCA).

Prior to 1951, District level Census data formed part of general reports and tables. Publication of District Census Handbooks as independent publications began from 1951 Census only.

In 1961, attempts were made to make the District Census Handbooks more informative and these contained valuable census data for each village and town of the district, indicating some basic amenities available in the villages. In 1971, the scope and coverage of both census and non-census statistics was further enlarged and the District Census Handbooks were published in two volumes, first containing the two Parts A & B and the second comprising Part C alone:—

Part A—Village and Town Directory.

Part B—Village and Townwise Primary Census Abstract.

Part C—Analytical Report, Administrative Statistics and District Census Tables.

The publication of Part-C was considerably delayed because of delay in getting the administrative statistics from the various departments. So, Part-C has been dropped this time. Moreover, the administrative statistics would be available to the data users from the publications of the respective departments.

Part-A of the 1981 District Census Handbook contains Village and Town Directory and Part-B contains Village and Townwise Primary Census Abstracts. Both the parts have been combined together in this volume. A tahsil map showing the village boundaries, the location code numbers of the villages, the distribution of various amenities in villages and the size class of their population, has been given in the beginning of Section I—Village Directory. An alphabetical list of villages in each tahsil has also been given, along with a note explaining the codes used in the Village Directory. The codes used in the Town Directory have been explained at the beginning of Section II—Town Directory.

## SCOPE

### Village Directory

#### Amenities and land use

The Village Directory provides certain basic data separately for each village, the villages in the district having been arranged tahsilwise and within the tahsil, location codewise. At the time of Census enumeration each village was assigned a code number for purposes of identification.

The format of the village directory follows the pattern canvassed in 1971 Census except for a few additional columns. The column for total population and number of households has been added to facilitate analysis of the village directory data. The column for the approach to village is aimed at having an idea of the number of inaccessible villages in a district. All the amenities except power supply in the village have been brought together with the instructions that if an amenity is not available in the village a dash (—) may be shown against

\*Provisional

the same in the relevant column but next to it the distance from the village of the nearest place where the facility is available may be given in broad ranges in brackets, the ranges being ;“(—5 kms.)”, “(5—10 kms.)” and “(10+ kms)”.

The Village Directory, therefore, contains information about the total area of the village (Column 3); total population and number of households (Column 4); and availability or otherwise of the amenities like educational, medical, drinking water, post and telegraph, day(s) of the market/hat and communications (Columns 5 to 10). In Columns 11 to 13, approach to village, nearest town and distance and availability or otherwise of power supply have been indicated. Column 14 shows the staple food of the people of the village. The area under different types of land use such as area under forest, area under cultivation (irrigated and unirrigated separately), culturable waste and the area not available for cultivation has been given in Columns 15—19. In Column 20 have been indicated the places of religious, historical or archaeological interest along with the information regarding newspapers, motor-cycles/scooters, cars/jeeps and tractors. The data presented in the village directory has been collected from the District/Tahsil revenue agency.

#### **Appendix 1**

This Appendix gives for each tahsil the number of villages having various levels and types of educational institutions, such as primary schools, middle schools, adult literacy centres etc. along with their number various types of medical institutions such as dispensaries, primary health centres etc. along with their number, various types of drinking water sources such as taps, tubewells etc., post and telegraph offices, power supply, railway station, bus stop etc. and also the number of villages not having these amenities.

#### **Appendix 2**

This Appendix gives for each non-municipal town (i.e. place treated as town only for Census purposes) the area under forest, irrigation, unirrigated land, culturable waste land and area not available for cultivation. But it remains blank as there is no such town in Sonipat district.

#### **Appendix 3**

This Appendix gives the list of villages where no educational, medical and public health facilities are available.

#### **Appendix 4**

This Appendix gives the list of villages with Scheduled Castes population in various ranges of proportion. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above.

#### **Town Directory**

The Town Directory consists of seven statements almost similar to those adopted for 1971 Census. These statements have been compiled from the information supplied by the local bodies. A few new columns have been introduced with a view to facilitating analysis of the data. A significant addition is of class of town in every statement because the infrastructure of amenities and facilities found in urban areas can be analysed by taking the class of town into consideration. The addition of the column on civic administration status in Statements III and IV and population in Statements IV and V also serves the same purpose.

The columns on Scheduled Castes population in statement IV and adult literacy classes/centres in Statement V have been provided keeping in view the Minimum Needs Programme of the Planning Commission.

Again if the fire fighting service as in Statement IV and medical or educational facilities as in Statement V are not available in the town, the name of the nearest town if in the same district or the name of the nearest district if in the same State or other State where available along with its distance from the referent town is given. This is a new feature of 1981 Census as it is necessary to identify the areas with no specific facility in every district. Details contained in each statement are given below.

Statement I gives the class and civic administration status of each town and provides some basic data based on the Primary Census Abstract (PCA) such as its area, number of households, density, sex ratio and population/growth rate. In case a town did not enjoy urban status at any Census, the relevant columns under the headings ‘Population and growth rate of the town at the Censuses of’ and ‘Sex Ratio’ have been left blank.

Where any town lost its urban status at any Census, the entry 'Declassified' has been made in the relevant columns. Class of each town has been presented according to 1981 Census population of the core town as follows:—

Population	Class
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Statement II gives the physical aspects of the various towns in the district. Data regarding minimum and maximum temperature is not available for any town in the district. Rainfall data is available for Gohana and Sonipat towns only.

Statement III indicates the position of Municipal Finances for the year 1978-79. Income and expenditure figures have been given in Rs. '00' in respect of each town in the district.

Statement IV shows civic and other amenities viz., roads, system of sewerage, number of latrines, method of disposal of night soil, water supply, fire fighting service and the number of electric connections as available during the year 1979. Sewerage facilities are available in Sonipat town only in addition to open surface drains whereas the towns of Ganaur and Gohana are served by open surface drains only. In all the towns the method of carriage of night soil is by wheel-barrow. In Ganaur, the practice of carriage of night soil by baskets is also continuing. Fire fighting service is available in Sonipat town only.

Statement IV-A is in respect of civic and other amenities in notified slums of Class I and II towns. The only Class I town in the district is Sonipat and the slum area comprises Bhim Nagar, Mahabir Colony, Dev Nagar, Garhi Gashita, Ram Nagar, Sham Nagar and Subhash Nagar. Some paved roads and road lighting points are available in these slums. Though the practice of carrying night soil as headload is continuing in all the slums, sewerage facilities are available in Bhim Nagar, Mahabir Colony and Ram Nagar only.

Statement V reflects the position of medical, educational, working women's hostel, recreational and cultural facilities for each town in the district during the year 1979. Under the heading medical facilities, the number of hospitals/dispensaries/TB Clinics etc. has been shown separately along with the total number of beds available. Under the heading educational facilities, number has been given separately of Arts/Science/Commerce Colleges, Medical Colleges, Engineering Colleges, Polytechnics, recognised Shorthand, Typewriting and Vocational Training Institutions, Higher Secondary/Secondary/Junior Secondary/Middle/Primary Schools and Adult Literacy Centres. In regard to recreational and cultural facilities the number of stadia, cinemas, auditoria and public libraries is indicated.

The Ganaur town does not have any college. There is one Arts and Commerce college in Gohana and two Arts, Science and Commerce colleges in Sonipat. There are thirteen Vocational Training Institutions in the district—five in Gohana and eight in Sonipat.

In Statement VI information regarding three most important commodities imported/exported and manufactured has been given along with the number of banks, agricultural credit societies, and non-agricultural credit societies. The items manufactured in the district include bicycles, steel tubes and pipes and *niwar* etc.

#### Primary Census Abstract of general population

##### (i) District Primary Census Abstract—

In the District Primary Census Abstract figures have been presented for the district as a whole as well as for each tahsil separately. 'T' stands for total population and 'R' and 'U' for the rural and urban areas, respectively.

##### (ii) Tahsil-wise Primary Census Abstract—

Here figures for each village and town (and within the town wardwise) in a tahsil have been presented.

At the time of Census enumeration, enumeration blocks were formed in the villages, each block consisting of about 750 persons and in the towns, each block consisting of about 650 persons. But the data have not been given for each block separately in the case of rural areas. In the case of urban areas total population and Scheduled Castes population have been shown blockwise in the appendix. Data in Columns-6—28 of the Primary Census Abstract have been given sex-wise. During 1971 Census break-up of workers into nine industrial categories was given whereas categories III, IV, V(b) and VI to IX have been combined together while presenting 1981 Census figures. A new concept of 'Marginal Worker' has been introduced this time.

#### Appendix

This Appendix gives at urban block level the total population and Scheduled Castes population.

#### Primary Census Abstract of Scheduled Castes population

In the District Primary Census Abstract of Scheduled Castes population figures have been presented for the district as a whole as well as for each tahsil/town separately.

### PHYSICAL ASPECTS

The district has a sub-tropical continental monsoon climate. From relief point of view, it is plain area. The river Yamuna on the eastern side forms a flood plain along its bed. Loam (*Bhangar* and *Nardak*) and silty loam (*Khadar*) soils are found in the district. Underground water level is comparatively high. A good net-work of canals has come up assuring prosperity for the region. The rainfall during 1979-80 was only 39.1 centimetres against 65.9 centimetres during 1976-77, 87.7 centimetres during 1977-78 and 97.3 centimetres during 1978-79. It reflects the inadequacy and uncertainty of rainfall which is mainly concentrated during the rainy season. This situation, however, has been considerably improved by the availability of irrigation facilities.

### ECONOMY

The economy of the district is primarily agricultural. At the time of 1981 Census, 59.40 per cent of the total main workers were cultivators and agricultural labourers. There were 162 registered working factories in the district during the year 1979 and the estimated number of workers employed in them was 12,281. In the district, Sonapat town is throbbing with industrial activity. It has a sound industrial base with a wide product-diversification. The large and medium scale units are engaged in manufacturing bicycles, cycle parts, mopeds, auto-components, handtools, electrical accessories, steel tubes, steel billets, chemicals, dehydrated vegetables, *vanaspati ghee*, soft drinks, beverages, sheet glass, sugar and beer etc. Atlas Cycle Industries Limited set up in 1951 produces bicycles and is one of the leading exporters. Milton Cycle Industries Limited manufactures bicycle components, Gedore Tools (India) Limited, known the world over for quality products, produces handtools. Bharat Steel Tubes Limited at Ganaur produces steel tubes and pipes. Sonapat Co-operative Sugar Mills is engaged in the production of sugar. Haryana Breweries Limited, Electric Construction and Equipment Company Limited, Hindustan Everest Tools Limited, Rubber Reclaim Company of India (Pvt.) Limited, Maco (Pvt.) Limited and Haryana Agro Food Processing Plant are some of the other large scale units at and near to Sonapat. There are many small scale units also in Sonapat district producing a large variety of products which include rubber, plastic and chemical products, paints, varnishes, drugs and pharmaceuticals, dyes, PVC shoes, weighing scales, machine tools, agricultural implements, hydraulic presses and other light engineering products, leather, food products, textiles, bullet proof helmets etc. Gohana town is known for producing *niwar*.

Irrigation in the district is mostly done by canals and tubewells. Area under cultivation of foodgrains mostly wheat and sugarcane was 198.3 and 12.7 thousand hectares respectively during the year 1979-80. There are no reserved forests. In 1977, the number of livestock in Haryana was 6,904,800 which includes cattle, buffaloes, horses and ponies, donkeys, sheep, goats, camels and pigs etc. Sonapat district contributed only 454,700 animals to this figure and these mostly include cattle, buffaloes and pigs. During 1979-80, the number of different types of motor vehicles on road was 93,583 in the State out of which 5,031 came from Sonapat district.

### HISTORY AND ARCHAEOLOGY\*

#### Antiquities

It is often believed that Sonapat (now spelt as Sonipat) was one of the five prasthas or towns demanded by Yudhishtira from Duryodhana as the price of peace. Another tradition ascribes its foundation to Raja Soni, thirteenth in descent from Arjuna, a brother of Yudhishtira. Both these traditions are without substance. There is no mention of Sonapat in the Mahabharata although it has been noted much earlier by the great grammarian Panini in his celebrated Ashtadhyayi. The town was therefore already in existence around 600 B.C. In 1871, some 1200 hemi-drachms of Graeco-Bactrians were unearthed here. The evidence of its occupation by Yaudheyas is available through the recovery of a large hoard of their coins here in the 11th century A.D., one Dipal Har was governor of Sonapat and was defeated by Sultan Masud of Ghazni in A.D. 1037 when he marched through the Punjab in an attempt to expand his empire in Hindustan.

\*Source: District Gazetteer Rohtak, 1970.

Among the ancient monuments, the Mosque of Abdullah Nasir-ud-din and the Tomb of Khwaja Khizr are worth mentioning. The mosque was built in A.D. 1272 in Balban's reign in the memory of a celebrated saint. The Tomb of Khwaja Khizr, a local celebrity who flourished in the reign of Ibrahim Lodi, is a fine structure of stone.

There are two villages namely Kundli (tahsil Sonipat) and Shamri (tahsil Gohana) whose people revolted against the British in the Uprising of 1857. They attacked and murdered some Englishmen who passed through these villages. The British, after the Uprising, confiscated the lands of the villagers as a measure of punishment.

### Tourist resorts

The State Government has provided oases of comfort, relaxation and recreation by creating tourist complexes for the road weary all over Haryana. These complexes include motels, restaurants and resorts. In the Sonipat district, the Department of Tourism has developed a tourist resort 'Chakor' which is situated in Sonipat town. It provides the facilities of restaurant, bar and a retail liquor vend.

### ANALYSIS OF DATA

Based on Village and Town Directory and Primary Census Abstract data the following inset tables have been compiled and presented in this volume.

Table 1 below indicates the population sexwise separately for rural and urban areas at district and tahsil level along with the number of villages and towns as per 1981 Census.

**TABLE 1**  
**Population, Number of villages and Towns, 1981**

Serial No.	Name of Tahsil	Population									No. of villages		No. of Towns
		Total			Rural			Urban			Total Inhabited		
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Gohana	269,339	143,066	126,273	243,151	129,073	114,078	26,188	13,993	12,195	94	91	1
2	Sonipat	577,426	310,807	266,619	451,568	242,639	208,929	125,858	68,168	57,690	254	240	2
Total District		846,765	453,873	392,892	694,719	371,712	323,007	152,046	82,161	69,885	348	331	3

Table 2 below gives percentage decadal (1971—1981) variation in population. This variation is more pronounced in urban areas than in rural areas. In Sonipat tahsil, the percentage decadal variation in respect of towns is the highest (77.79) which seems to be due to steep rise in the population of Sonipat town.

**TABLE 2**  
**Decadal change in distribution of population**

Tahsil	Population						Percentage decadal (1971—81) variation		
	1971			1981			Total	Rural	Urban
	Total	Rural	Urban	Total	Rural	Urban			
1	2	3	4	5	6	7	8	9	10
Gohana	231,946	215,192	16,754	269,339	243,151	26,188	16.12	12.99	56.31
Sonipat	455,040	384,248	70,792	577,426	451,568	125,858	26.90	17.52	77.79
District	686,986	599,440	87,546	846,765	694,719	152,046	23.26	15.89	73.68

Table 3 below presents distribution of villages according to the size of population. This table shows that 47.73 per cent of the villages in the district are medium sized having population in the range 500—1,999 whereas 36.86 per cent of the villages fall in the population range of 2,000—4,999.

**TABLE 3**  
**Distribution of villages by population ranges**

Range of population	Number of villages in each range	Percentage of villages in each range
1	2	3
—200	9	2.72
200—499	24	7.25
500—1,999	158	47.73
2,000—4,999	122	36.86
5,000—9,999	18	5.44
10,000+	..	..
Total	331	100.00

Table 4 below shows the distribution of villages by density. In 45.02 per cent of villages in the district, the density of population per square kilometre falls in the range 301—500 whereas in 27.49 per cent it falls in the range 201—300. In 14.20 per cent of villages this density is above 500.

**TABLE 4**  
**Distribution of villages by density**

Range of density (per sq. km.)	Total number of villages in each density range	Percentage of villages in each density range
1	2	3
—10	2	0.60
11—20	2	0.60
21—50	4	1.21
51—100	8	2.42
101—200	28	8.46
201—300	91	27.49
301—500	149	45.02
501+	47	14.20
Not known	..	..
Total	331	100.00

Table 5 below gives the proportion of Scheduled Castes population to total population in the villages. In 29.91 per cent of villages percentage of Scheduled Castes population to total population is above 20 per cent. In 2.72 per cent of villages there is no Scheduled Castes population at all.

**TABLE 5**  
**Proportion of Scheduled Castes population to total population in the villages**

Percentage range of Scheduled Castes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	9	2.72
5 or less	12	3.63
6—10	24	7.25
11—15	87	26.28
16—20	100	30.21
21—30	87	26.28
31 and above	12	3.63
Total	331	100.00

Table 6 below relating to proportion of Scheduled Tribes population to total population in the villages is not applicable as there are no Scheduled Tribes in the Haryana State.

**TABLE 6**  
**Proportion of Scheduled Tribes population to total population in the villages**

Percentage range of Scheduled Tribes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3

5 or less		
6—15		
16—25	Not applicable	
26—35		
36—50		
51 and above		
Total		

Table 7 below gives proportion of Scheduled Castes population to total population in each town of the district. 11.50 per cent of the total urban population in the district belongs to Scheduled Castes.

**TABLE 7**  
**Proportion of Scheduled Castes population in Towns**

Name of the Town	Total population (including institutional and houseless population)	Total Scheduled Castes population	Percentage of Scheduled Castes population to total population
1	2	3	4
Ganaur	16,489	1,902	11.53
Gohana	26,188	3,495	13.35
Sonipat	109,369	12,092	11.06
All Towns	152,046	17,489	11.50

Table 8 below reflects literacy rates by population size of villages. Literacy rate for the district is 36.76. Majority of the villages in the district have the literacy rate near to or above the district level literacy rate.

**TABLE 8**  
**Literacy rates by population ranges of villages**

Range of population	Number of villages in each range	Literacy rate
1	2	3
—200	9	27.02
200—499	24	36.86
500—1,999	158	37.38
2,000—4,999	122	36.23
5,000—9,999	18	37.41
10,000+	..	..
Total	331	36.76

**Table 9** below indicates the literacy rates for the various towns in the district. Sonipat town has a literacy rate higher than the district literacy rate (59.54). Gohana town has the lowest literacy rate.

**TABLE 9**  
**Literacy rates for Towns**

Name of the Town	Literacy rate (per cent)
1	2
Ganaur	58.89
Gohana	53.07
Sonipat	61.19
All Towns	59.54

**Table 10** shows the position of literates, workers/non-workers, scheduled castes/tribes population in the district. 16.79 per cent of the population in the district belongs to Scheduled Castes. The number of literates is 40.85 per cent. Workers including marginal workers form 32.21 per cent of the population whereas the remaining 67.79 per cent are non-workers.

**TABLE**  
**Literates, Workers, Non-workers, Scheduled**

Table 11 below gives distribution of villages according to availability of different amenities. Among the inhabited villages, drinking water and power supply are available in all the villages. Educational facility is also available in 94.86 per cent. Majority of the villages are connected by pucca roads and have medical and communication facilities.

**TABLE 11**  
**Distribution of villages according to the availability of different amenities**

Sl. No.	Name of tahsil	Number of inhabited villages	Number (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & Telegraph	Market/Hat	Communication	Approach by pucca road	Power supply

†Although entered as 'Be-Chirag' (Un-inhabited) in the Revenue record, the population shown against this village was enumerated at the time of 1981—Census.

\*Total population and part of the area of the village has come within the municipal limits.

Notes:—(1) Where a town and village bear an identical name the word (Rural) has been added after the name of the village.  
(2) The area of a village (revenue estate) is supplied by the Revenue Patwari.

†Total area figures for the district represent "Geographical Area Figures" supplied by the Surveyor General. Figures for urban areas are those supplied by the Local Bodies. Area figures for the rural areas are derived by subtracting the urban area from the total area of the district. The total of area figures of Tahsils in the district will not tally with the district figures because the former are derived from the village-wise area figures supplied by the Tahsildars.

†Although entered as 'Be-Chirag' (Un-inhabited) in the Revenue record, the population shown against this village was enumerated at the time of 1981-Census.

- Notes:—1. Where a town and village bear an identical name, the word (Rural) has been added after the name of the village.  
 2. The area of a village (revenue estate) is based on the information supplied by the Revenue Patwari and includes urban area, if any.
